Final Comments

The homes you see listed here are actual homes that have either sold in the past twelve months in your neighborhood or are currently on the market. This report was provided as a "rule of thumb" approach to price comparisons. The actual market value of any home depends on a number of facts. Items to consider include, curb appeal, square footage, number of bedrooms, needed repairs or updates, overall cleanliness, and floor plan. Other facts to consider may include, willingness to sell, reasons for selling, or other factors that have no direct bearing on the home itself. The actual market value can be subject to these items as well.

We would recommend that you request a full and complete market analysis from one of our trained professionals in order to establish your homes current value. Keep in mind this value may or may not be what you believe it should be as home prices fluctuate much like the stock market. Keep in mind that we feel the 2009 home market in Kosciusko County will continue to be moderate throughout the year and homes that are priced correctly will be the ones that will catch most of the attention.

Buyers are having difficulties in attaining mortgages and are being cautious while choosing a lender. In the same reflection they are being cautious in choosing the homes they want to see and purchase. It bears repeating that the homes that are properly priced and properly presented will ultimately be the ones that sell during this slow market. When putting your home on the market I would encourage you to get more than one opinion. Prepare yourself to ask intelligent questions. If you are not sure of the correct questions we will provide at no cost a list of questions that can and should be asked.

Thank you for taking the time to view these pages and if you have any questions we invite you to either write or call our office for the answers to those questions. Have a great 2009!

Very Sincerely

Terry L. Baker
