There is currently insufficient information to complete this report. This means that there was only one home in this sub-division that sold. In most cases there were none.

You may look at this as a negative but actually we see it as a positive. Since nothing has sold in this sub-division it makes it a prime location for the sale of homes. Stable communities make desirable living conditions.

Should you be considering the sale of your home I would strongly encourage you to do so. Please call for a complete and detailed market analysis before you do.

Thank you for visiting Kosciusko County Lakes Realty web-site. It is our pleasure serving you...

Sincerely
